<b>Preface</b> .....	<b>ix</b>
<b>About the Editor</b> .....	<b>xi</b>
<b>About the Authors.</b> .....	<b>xiii</b>
<b>Acknowledgments and Dedication</b> .....	<b>xix</b>
<b>Chapter 1 Main Properties and Classification of Flat Rolled Products</b>	
1.1 Classification Schemes for Steels .....	1
<i>Bruno C. De Cooman, John G. Speer</i>	
1.2 Microstructural Characteristics of Steels .....	9
<i>Vladimir B. Ginzburg</i>	
1.3 Physical Properties of Steels .....	22
<i>Vladimir B. Ginzburg</i>	
1.4 Geometrical Parameters of Flat Rolled Products .....	39
<i>Vladimir B. Ginzburg</i>	
1.5 Characterizing Thickness Variations During Rolling .....	55
<i>Mark E. Zipf</i>	
<b>Chapter 2 Theory of Flat Rolling Process</b>	
<i>Vladimir B. Ginzburg</i>	
2.1 Basic Principles of Macroscopic Plasticity .....	67
2.2 Theories of Flat Rolling .....	75
2.3 Resistance to Deformation in Flat Rolling .....	86
2.4 Heat Transfer During Rolling of Flat Products .....	101
<b>Chapter 3 Metallurgical Aspects of the Flat Rolling Process</b>	
<i>Jose M. Rodriguez-Ibabe</i>	
3.1 Microstructural Changes in Steels During Hot Rolling .....	113
3.2 Strengthening Mechanisms in Steels .....	136
3.3 Thermomechanical Treatment During Rolling and Cooling of Steels .....	148
3.4 Effect of Metallurgical Factors on Mechanical Properties of Steels .....	159

**Chapter 4 Metallurgical Design and Applications of Flat Products**

*Bruno C. De Cooman, John G. Speer*

4.1	Low-Carbon Steel . . . . .	171
4.2	Structural CMn Steel . . . . .	238
4.3	Stainless Steel . . . . .	259
4.4	Specialty Steels . . . . .	295
4.5	Coated Sheet Steel . . . . .	325

**Chapter 5 Rolling Mills for Flat Products**

5.1	Classification of Rolling Mills. . . . .	353
	<i>Vladimir B. Ginzburg</i>	
5.2	Hot Strip Mills With Thick- and Medium-Slab Casters . . . . .	363
	<i>R. Borsi, A. Pigani, L. Frezza, S. Jingquan, L.X. Hong, Z.L. Gang</i>	
5.3	Hot Strip Mills With Thin- and Medium-Slab Casters . . . . .	368
	<i>Vladimir B. Ginzburg</i>	
5.4	Continuous Strip Production (CSP) Plants . . . . .	389
	<i>Christian Bilgen, Christian Geerkens, Christian Klinkenberg, Stephan Krämer, Christoph Klein, Jürgen Müller, Dieter Rosenthal</i>	
5.5	Steckel Mills for Production of Strip. . . . .	401
	<i>Stephan Kramer, Gunter Knepe, Dieter Rosenthal</i>	
5.6	Steckel Mills for Production of Coiled and Discrete Plates . . . . .	415
	<i>Andrzej Groch, Jeffrey White, John P. Galluci, Norman L. Samways</i>	

**Chapter 6 Endless Hot Rolling Strip Production Plants**

6.1	Endless Hot Rolling With Thick Slab . . . . .	427
	<i>Takeshi Takano, Keiji Matsuda, Shoichi Moriya, Nobuhiro Shibatomi, Yoshiki Mito, Kanji Hayashi</i>	
6.2	Endless Hot Rolling With Thin Slab . . . . .	435
	<i>G. Arvedi, F. Mazzolari, A. Jungbauerl, G. Hohenbichler, G. Holleis</i>	
6.3	Endless Rolling Castrip® Plant . . . . .	441
	<i>R. Mahapatra, W. Blejde, M. Schueren, G. McQuillis, C. Killmore, K. Carpenter, D. Edelman, P. Woodberry</i>	

**Chapter 7 Cold Rolling Mills**

7.1	SMS Demag Cold Rolling Technology . . . . .	489
	<i>Karl Hoen, Rüdiger Holz, Falk Töpfer</i>	
7.2	Siemens VAI Cold Rolling Technology. . . . .	497
	<i>Georg Bytomski, Stanislas Mauuary, Gregor Nopp, Gerlinde Djumljia</i>	
7.3	Rolling Method for Reversing Cold Mills. . . . .	500
	<i>Tanehiro Kikkawa</i>	

**Chapter 8 Reheating and Heat Retaining Equipment**

8.1	Pusher and Walking Beam Reheat Furnaces	
8.1.1	Design of Pusher and Walking Beam Reheat Furnaces . . . . .	513
	<i>Jared S. Kaufman</i>	
8.1.2	Development of Compact Regenerative Burners in Hot Rolling Mills . . . . .	525
	<i>Motoki Takada, Koichi Takashi, Toshiaki Amagasa, Tomoaki Tadama, Hiroyuki Nakashima</i>	
8.2	Tunnel Furnaces . . . . .	533
	<i>Jared S. Kaufman</i>	
8.3	Coilboxes . . . . .	543
	<i>Tarif Korabi, Hugh B. Johnson, Frank M. Wheeler</i>	

**Chapter 9 Edging, Sizing and Leveling Equipment**

9.1	Edgers. . . . .	555
	<i>Gerlinde Djumljia, Reinhold Fogel, Karl Mayrhofer, Günter Thaller</i>	
9.2	Sizing Presses. . . . .	562
	<i>Tazoe Nobuhiro, Dodo Yasushi, Nishii Takashi</i>	

9.3	Levelers	
9.3.1	Advanced Strategies for Leveling for High-Strength Heavy Plate Production . . . . .	571
	<i>Detlef Ehlert, Matt Korzi, Thomas Koch, Gerhard Horn, Roman Dehmel</i>	
9.3.2	Heavy QT Plate Cold Leveling and Tools for Flatness Control. . . . .	576
	<i>Anders Carlestam</i>	
<b>Chapter 10 Main Drive Motors and Spindles</b>		
10.1	Main Drive Motors. . . . .	587
	<i>Ronald I. Tessendorf</i>	
10.2	Spindles	
10.2.1	Gear Spindles for Compact Hot Strip Mills . . . . .	605
	<i>Jon R. Mancuso, Parthiv Amin, Matthew A. McGinnity, Rick Doan</i>	
10.2.2	New Developments in Drivetrains for Roughing and Plate Mills . . . . .	615
	<i>Christoph Sundermann, William Malan, Eckehard Jung, Ralf Gehle</i>	
<b>Chapter 11 Rolls and Bearings</b>		
11.1	Work Roll Technology for Hot Strip Mills	
11.1.1	Up-To-Date Trends of Rolls Technologies for Advanced Rolling Mill Applications . . . . .	623
	<i>Claude Gaspard, D. Batazzi, J. Tinoco</i>	
11.1.2	Current Developments of Alloyed Steels for Hot Strip Roughing Mills: Characterization of High-Chromium Steel and Semi-High-Speed Steel . . . . .	630
	<i>Jacqueline Lecomte-Beckers, Mario Sinnaeve, T. Jerome Tchuindjang</i>	
11.1.3	Multiscale Finite Element Modeling and Microstructural Evaluation of Centrifugally Cast High-Speed Steel Finishing Rolls . . . . .	639
	<i>K.V. Redkin, J.S. Vipperman, C. Hrizo, R. Schleiden, C.I. Garcia</i>	
11.2	Surface Coating and Texturing of Work Rolls for Cold Mills. . . . .	653
	<i>Michael Utsch, Peter Vinke</i>	
11.3	Backup Roll Bearings . . . . .	659
	<i>Andres Esteban, Gabriel F. Royo, Peter N. Osgood</i>	
<b>Chapter 12 Coiling Equipment</b>		
12.1	Heavy-Duty Coiler for Hot Strip Mill . . . . .	669
	<i>Stephan Krämer, Olaf N. Jepsen, Stefan Berger</i>	
12.2	Coiler for Endless Hot Rolling Process. . . . .	672
	<i>Hiroaki Kuwano</i>	
<b>Chapter 13 Descaling, Cooling and Rolling Lubrication Systems</b>		
13.1	Descaling Equipment . . . . .	681
	<i>Steve DeMar</i>	
13.2	Roll Cooling and Lubrication in Cold Rolling . . . . .	689
	<i>J.B.A.F. Smeulders</i>	
13.3	Roll Cooling and Lubrication in Hot Rolling . . . . .	699
	<i>James E. Murphy</i>	
<b>Chapter 14 Temperature Control in Hot Rolling Mills</b>		
14.1	Temperature Control in Reheat Furnaces . . . . .	715
	<i>Ashok D. Acharya, Sirshendu Chattopadhyay</i>	
14.2	Heat Conservation Between Roughing and Finishing Mills . . . . .	723
	<i>Vladimir B. Ginzburg, Winfried F. Schmiedberg</i>	
14.3	Coiling Temperature Control . . . . .	737
	<i>Michael A. Smith, Klaus Weinzierl</i>	
<b>Chapter 15 Gauge Control in Rolling Mills</b>		
15.1	Gauge Control in Cold Mills . . . . .	753
	<i>Mark E. Zipf</i>	

15.2 Gauge Control in Hot Strip Mills . . . . .	840
<i>Hiroshi Haraki, Ryoichi Takahashi, Kazuyoshi Kimura</i>	

**Chapter 16 Width, Plan View and Steering Control in Rolling Mills**

16.1 Width and Plan View Control in Hot Strip Mills. . . . .	851
<i>Vladimir B. Ginzburg</i>	
16.2 Width and Steering Control Systems. . . . .	859
<i>Vladimir B. Ginzburg</i>	
16.3 Steering Control Systems for Reversing Hot Strip Mills . . . . .	869
<i>Michael J. Steeper, David G. Park</i>	

**Chapter 17 Profile and Flatness Control in Rolling Mills**

17.1 Continuous Variable Crown Control (CVC) Technology . . . . .	875
<i>Peter Lixfeld, Andrzej Groch</i>	
17.2 Edge-Oriented Shifting Technology . . . . .	890
<i>Tanehiro Kikkawa</i>	
17.3 Pair-Cross (PC) Technology. . . . .	897
<i>Hiroshi Aratani, Ryuichi Ozono, Tsuneo Nakano</i>	

**Chapter 18 Control of Surface Quality of Rolled Strip**

18.1 Detection Methods of Surface Defects . . . . .	907
<i>Reinhard Rinn</i>	
18.2 Development of Surface Inspection Systems. . . . .	916
<i>Liwei Zhang, Hal Long, James Chapko</i>	

**Chapter 19 Control of Metallurgical and Mechanical Properties of Rolled Strip**

19.1 Control of Strip Metallurgical Properties . . . . .	927
<i>Klaus Weinzierl, Hans Ulrich Löffler, Martin Rößiger, Udo Houben</i>	
19.2 Control of Strip Mechanical Properties . . . . .	935
<i>Hans-Ulrich Löffler, Rüdiger Döll, Thomas Poppe, Günter Sörgel, Udo Holtheuer, Gustav Zouhar</i>	

**Chapter 20 Vibration and Chatter Control in Rolling Mills**

20.1 Torsional Vibration Chatter in Rolling Mills. . . . .	943
<i>Jifeng Wang, Lionel M. Cartright</i>	
20.2 Prevention of Vibrations and Chatter in Hot Strip Mills . . . . .	948
<i>Efrain Ubici, Martín Borda, Andreas Klempnow, Julio Piñeyro</i>	
20.3 Diagnosing Chatter in Cold Mills . . . . .	954
<i>Derek Vines</i>	

**Chapter 21 Process Control Systems in Rolling Mills**

21.1 Process Control Systems for Hot Rolling Mills . . . . .	961
<i>Włodzimierz Filipczyk, Władysław Turowski</i>	
21.2 Process Control Systems for Thin Strip Production . . . . .	976
<i>Naoki Shimoda, Ken Okamoto, Wan Hailong, Liu Wenzhong</i>	
21.3 Process Control Systems for Plate Mills . . . . .	985
<i>Rüdiger Döll, Werner Nothegger</i>	
21.4 Process Control Systems for Cold Mills . . . . .	992
<i>Tirlochan S. Bilkhu</i>	

**Chapter 22 Process Lines**

22.1 Continuous Pickle Lines With Tandem Cold Mills	
22.1.1 Danieli Cold Mill Complex Turboflo® With 6-High Mini Tandem Mill for Automotive Applications . . . . .	1009
<i>Michele Turchetto, Tommaso Settimo, Luciano Vignolo</i>	
22.1.2 Pickling and Tandem Cold Rolling Technologies for Severstal North America in Dearborn, Mich. . . . .	1015
<i>Yoichi Kai, Mark R. Blankenau, John M. Tomasaitis, Larry Flowers, Motoyuki Fujii, Shunsaku Kasai</i>	

---

22.2 Quality Aspects of HPH Annealed Steel Strip . . . . .	1026
<i>Richard Fielder, Peter Wendt</i>	
22.3 Strip Cleaning Lines . . . . .	1034
<i>Akihiko Hotani, Kazuo Onishi</i>	
22.4 Coating Lines	
22.4.1 New Galvanizing Line Coupled With High-Speed Painting Line at at Marcegaglia's Ravenna Plant, Italy . . . . .	1039
<i>M. Bianco</i>	
22.4.2 Recent Trends in Hot-Dip Galvanizing of Advanced High-Strength Steel at ThyssenKrupp Steel Europe. . . . .	1045
<i>Martin Norden, Marc Blumenau, Rudolf Schönenberg</i>	
22.4.3 New Electrolytic Tinning Line and Tin-Free Steel Line for Baosteel, China . . . . .	1052
<i>Kamio Keiji, Ninomiya Yoshifumi, Chen Shenghe, Wang Wen</i>	
22.5 Process Control Systems for Process Lines. . . . .	1063
<i>Thomas Tainer, Stephen Jekielek</i>	
<b>Sources . . . . .</b>	<b>1075</b>
