

Acknowledgments and Dedication

The Making, Shaping and Treating of Steel[®], 11th edition, Flat Products Volume is the result of industry-wide cooperation to continue the established standards of the Making, Shaping and Treating of Steel series. Companies and individual contributors devoted their time and resources to continue the 90-year tradition of compiling contemporary technical information for the manufacturing of steel.

The Association for Iron & Steel Technology (AIST) would like to thank the companies that provided content and assistance: Åkers AB, Applied Fluids, ASB Industries, Nucor Corp. and Castrip, Danieli, Dover Hydraulics, George Kelk (Vishay), IHI-MetalTech Co. Ltd., Metaltech, Quaker Chemical, Shapeline, Siemens, SMS Siemag LLC, SR-Instruments Oy, Tenova Core Inc., Thermo Fisher, ThyssenKrupp, TMEIC and WhemCo. In addition, AIST would like to commend the following individuals for their assistance: Jose Maria Rodriguez-Ibabe, Matthew Knapik, Wal Blejde, Paolo Bobig, Parrish Gallant, Keith Watson, Thomas Suski, John B. Tiley, Jared Kaufman, Bruno C. De Cooman, John G. Speer, Tazoe Nobuhiro, Tara Taylor, Tatyana Ginzburg and Sheryl Rowe.

AIST would also like to acknowledge the permission of CRC Press and Taylor-Francis for use of material previously published by Dr. Vladimir Ginzburg.

The Flat Products Volume was produced through the guidance and support of the MSTS Steering Committee, the Association for Iron & Steel Technology's Board of Directors and the AIST Foundation Board of Trustees. The AIST Foundation's generous support is also acknowledged in the production of this volume.

As the chair of the MSTS Steering Committee, Dr. Kent D. Peaslee recognized the important role of a contemporary technological curriculum for educating the next generation of industry professionals. Although he passed away earlier this year, Dr. Peaslee was truly the driving force behind this effort, and we are pleased to bring his vision to reality and dedicate this publication in his memory.

AIST Board of Directors:

Terry G. Fedor II, Cliffs Natural Resources
Kent D. Peaslee, Missouri University of Science & Technology (deceased)
Glenn A. Pushis, Steel Dynamics Inc. – Flat Roll Division
Michael D. Garcia, Evraz Highveld Steel and Vanadium
George J. Koenig, Berry Metal Co.
Anton Lukac, United States Steel Corporation
Wendell L. Carter, ArcelorMittal Indiana Harbor
Randy C. Skagen, Nucor Steel Tuscaloosa Inc.
William C. King II, United States Steel Corporation
Fred T. Harnack, United States Steel Corporation
Donald J. Bryant, Nucor Steel Tuscaloosa Inc.

Robert H. Carlin, DTE Energy Services
Thomas G. Euson, 3S Inc.
Kip O. Findley, Colorado School of Mines
Stavros G. Fountoulakis, ArcelorMittal USA
James J. Hendrickson, ArcelorMittal Burns Harbor
Patrick L. Jablonski, Nucor Steel Seattle Inc.
Jeffrey T. Johnson, Nucor Steel–South Carolina
Robert G. Kneale, Gerdau Long Steel North America
Francesco Memoli, Tenova Core/Tenaris
Colleen M. Reeves, Corrosion Fluid Products
Dennis B. Rodal, ELG Haniel Metals Corp.
Otavio M. Sanabio, O&S Consultoria E Servicos Ltda.
William K. Schlichting, United States Steel Corporation
Fred Shenvar, ArcelorMittal Indiana Harbor
Michael A. Urbassik, Electric Controller & Manufacturing Co. LLC
John T. Wilson, MINTEQ International Inc.
Robert H. Woods, California Steel Industries Inc.

AIST Foundation Board of Trustees:

Frederick T. Harnack, United States Steel Corporation
Thomas J. Russo, MMFX Technologies Corp.
Steven S. Hansen, SSAB Americas
William C. King, United States Steel Corporation
Daniel J. Brisson, Nucor Steel–Indiana
William H. Emling, SMS Siemag LLC
Eric D. Hauge, ArcelorMittal Cleveland
Kolin L. Keller, CMC Americas
Robert C. Kuhn, Riverside Refractories Inc.
Theodore F. Lyon, Hatch Associates Inc.
Richard P. Teets Jr., Steel Dynamics Inc.
Yuan Wang, Gerdau Long Steel North America
Chenn Q. Zhou, Purdue University–Calumet

Producing a book of this magnitude requires a strong internal commitment. In addition to the MSTS Steering Committee, the material was reviewed for quality and accuracy by the volunteer members of AIST's Hot Sheet Rolling, Cold Sheet Rolling, Galvanizing, Plate Rolling, and Metallurgy — Processing, Products & Applications Technology Committees in addition to AIST's staff engineers. AIST's editorial and graphics staff also deserve special recognition for their extensive efforts to ensure a quality production: Chris Brown, Carolyn Trobaugh, Brian Bliss, Jaime Beddings, Krista McGhee and Amanda Blyth. Leading this internal effort were Kurt Edwards and Karen Hickey, whose steadfast guidance, cooperative perseverance and commitment to excellence were essential to the book's completion.

Finally, AIST would like to thank and congratulate our lead editor, Dr. Vladimir Ginzburg, for his comprehensive knowledge, sincere diligence and enduring passion throughout the production of the Flat Products Volume. AIST is proud to be the publisher of the *Making, Shaping and Treating of Steel* series, and will continue to work to advance the technical development, production, processing and application of iron and steel.

Ronald E. Ashburn
Executive Director and Secretary,
AIST and the AIST Foundation
September 2013
